1 SOURCE PAIR
variant A: negated
"I don't like the new medication."
variant B: affirmative
"I like the new medication."
differ on one dimension
2 VISIBLE INPUT CHANNEL
bare like medication
+word like new medication
+chip [NOT] like medication
+all chips [NOT] [TELL] [I] like medication
full I don't like the new medication.
blue = critical cue visible to the model
3 GENERATE
LLM
4 models
P0 / P2 / S3
4 OUTPUT
"I like the medication."
GPT-6.1-terra, bare input
5 BLIND EXTRACTION
LLM judge
sees the output only, not the source or channel
polarity affirmative
agent speaker
speech act statement
6 DETERMINISTIC ATTRIBUTION
Loss
critical value not recoverable from the visible input
Violation
cue visible, but output value ≠ source value
Assumption
no cue, but output commits to a definite value
label vs item spec + channel; no judgment
